KANBAN METHOD

General Practices

1. Visualize (with kanban board)
2. Limit work-in-progress (with kanban)
3. Manage flow
4. Make policies explicit
5. Implement feedback loops
6. Improve collaboratively, evolve experimentally using models & the scientific method

Service Delivery Principles

Your organization is a network of interdependent services with policies that determine its behaviour.
Therefore:

1. Understand and focus on the customer's needs and expectations
2. Manage the work; let workers self-organize around it
3. Regularly review the network and its polices to improve outcomes.

Change Management Principles

1. Start with what you do now
   - Understanding current processes, as actually practiced
   - Respecting existing roles, responsibilities & job titles
2. Gain agreement to pursue improvement through evolutionary change
3. Encourage acts of leadership at all levels

Let's do something about it!

15 min

Closing Discussion: Let's do something about it!

- What will you do differently in your organization when you get back to your office next week?
- Do you have steps identified to establish or strengthen feedback loops (see the 6 cadences)?
- What options do you have to implement practices, gather data and insights, share and reflect and take further improvement actions?
- Is your organization ready for The Kanban Method? Or do you need the insights from the Change Leadership Masterclass or an experienced AKC to help gain acceptance for the necessary changes?
